## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "said selected ones" and "said plurality of potential" in claim. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shkedy (6,260,024) in view of Chou et al (6,035,289).

In regards to claim 1, Shkedy teaches all the limitations of claim 1, except the representation of shipping resources and potential commitments of shipping resources. Chou teaches a method for managing and receiving bids on shipping that show to the user the available shipping capacity and also posts asks and bids (potential commitment). It would be obvious to a person of ordinary skill in the art to include in Shkedy the representation of shipping resources and potential commitments of shipping resources as taught by Chou, because this would offer added flexibility the invention of

Shkedy to further negotiate the shipment of the products which are sold through the system.
